

BUSINESS ADMINISTRATION, A.S.

Major Code: 0671

The associate in science degree in Business Administration requires half the course work to be divided among the humanities, the mathematics/science and the social science fields of study. The emphasis is in the mathematics/science area where four courses are required for graduation. The other half of the required course work is in the applied business area as described in the Business Administration A.A.S. degree description. This program is fully accredited by the Accreditation Council for Business Schools and Programs (ACBSP).

While a large majority of students who graduate with the A.S. degree transfer to bachelor degree programs, experience has shown that the background acquired from the business courses is sufficient to make a student eligible for a wide range of positions in business and government, as well.

This degree is primarily a transfer program; however, some students chose to enter the workforce.

Student Learning Outcomes

Upon successful completion of this program, students will be able to:

- Communicate effectively and purposefully, integrating technology into writing and presentations.
- Identify problems, analyze information, and form conclusions within the business context.
- Possess analytical/quantitative skills appropriate to the business community

Curriculum Requirements

A minimum of 60 credits is required for degree completion.

Code	Title	Credits
